Demo of ArcGIS-X by ESRI, India held on 25.07.2011.

Special features of ArcGIS-X:

- ❖ Simple Digital Image Processing operations viz.contrast enhancement , gamma analysis, hill shading, mosaicing, NDVI, filtering etc.can be performed now.

- ❖ Attribute tables of different files can be opened in a single window which helps in a better comparison.

- ❖ KML/KMZ formats can be imported to Geodatabase format that is the native file of ArcGIS.
