

ACTION HISTORY OF RTI REQUEST No.FSOID/R/E/24/00013

Applicant Name Jugananda Chetia

Text of Application Respected sir/madam, kindly provide me with the answers to the following questions: 1. In the context of our net zero goal, what was the total GHG emission as well as total carbon absorption capacity of India, including forest covers, soil etc., in the years 2021 and 2022? 2. How much emission gap do we need to plug, that is, how much GHG are we emitting in excess of our carbon absorption capacity, as it stands now? 3.What is the exact procedure to estimate the capacity of carbon sink in our country? 4. based on what data does one concludes that it has achieved net zero, that is, do we just compare total GHG emission with the carbon absorption capacity?

Reply of Application please find attachment for sought information.
