Dear Sir,

Kindly inform if land around at Lake Guru Dong Maar in north Sikkim, location detail is as Latitude: 28.023617°, Longitude: 88.710731°. Whether declared as Forest Land in absence of tree line on an high elevation of 5189 meters, and which is also not under Govt records, whether mapped by your department as forest land?

If yes, please elaborate on what grounds is it declared Forest Land? Please inform its current status.

It is to bring in your kind notice that the Hon'ble Supreme Court Godavarnam v/s Union of India, in its order dated 12th December 1996 has laid down that there must be two conditions to declare any land as forest i.e. either it should have any Govt., record or tree canopy but none is available there in respect of the subject of the land.

The panoramic view shows barren mountains all around it which remains covered with perpetual snow, other records shows aquatic vegetation is nil there because poor Sun light, cool surface, barren and rocky land which do not allow any seed to germinate and it's much over the altitude where tree line ends at Thangu at 14000'.

*The first condition is that there should be forest on this land, a canopy of trees. And according to this condition, one should look up the meaning of 'Forest' in the dictionary. The Oxford Dictionary defines forest as a clump of trees (Tree canopy).*

Sikkim, whose forest cover is 44.37% (ISFR 2019 shows it 47.11%) of its total geographical area, the 40% out of one hectare of its land, must be covered with trees as it's a mountainous state.

*The second condition laid down by Supreme Court is to have any govt record means a revenue receipt on forest. **The SDM Chungthang states in his letter that this land doesn't come under revenue land.***

Sikkim forest department doesn't fulfil any of these conditions; hence the land at the Shore of Guru Daang Maar Lake can't be called Forest land as per the conditions laid down by hon'ble Supreme Court of India.

***On October 10, 2018, in a response to the Parliamentary Standing Committee on Science, Technology, Environment, Forest and Climate***

**Change, the Director General (Forests) and special Secretary, MoEF&CC, said;**

**“Sir, actually, if we define ‘forests’, it could create many loopholes that may be exploited. So, right now, we are going by the definition given by the Supreme Court. As of now, ‘forest’ means any area that is recorded as forest in any Government record irrespective of whether it is having a forest growth or not.”**

**1- Panoramic view of Lake Guru Dongmar where no vegetation or tree is seen;**

**Land around Guru Dong Maar Lake where no vegetation or tree is seen.**

### **Views of a tourist expressed after visiting at the Lake Guru Dong Maar;**

No habitation beyond the check point and just the natural setup, there was vast stretch of barren land no vegetation just the curved roads going uphill, it was the undulating dry land, the mountains were just black and white, the black rock and the bright glowing snow on the top. To add to it is the blue sky just setting a background for these mountains.

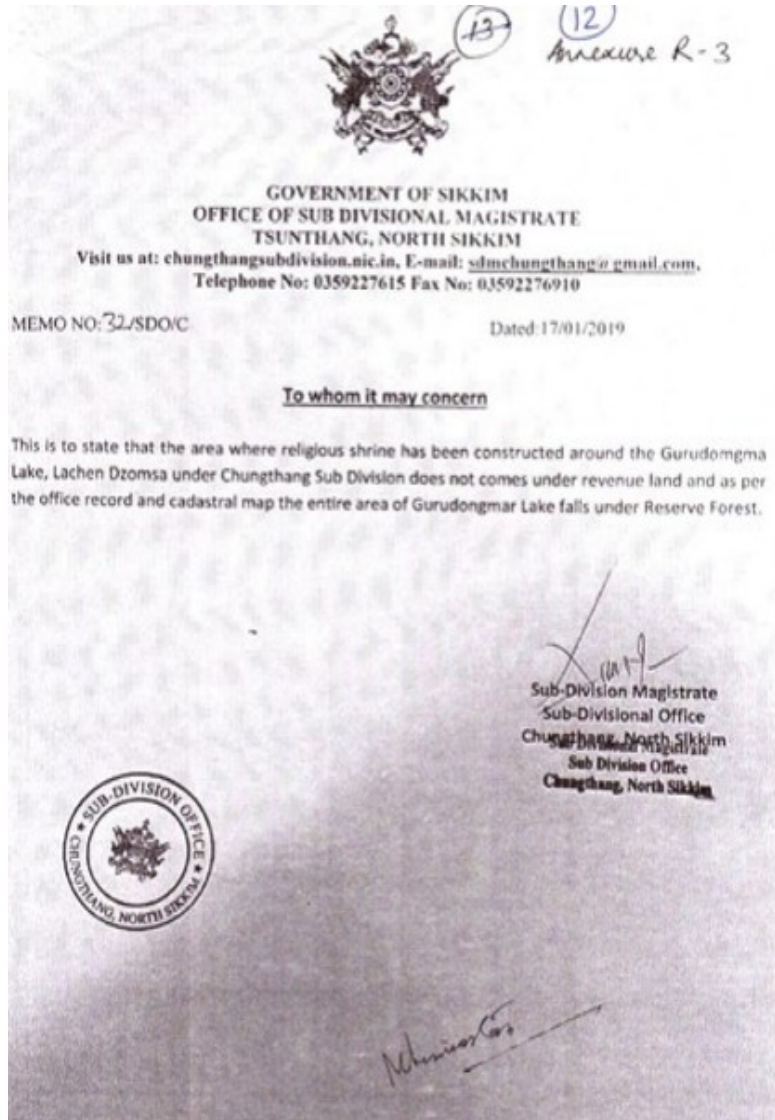

It was like an unending stretch of land after half an hour driving on that road we were at the parking area of the Gurudongmar Lake, peeping out of the window we were just awestruck.

In this high security zone is one of most picturesque scenes.

## Barren, rocky and snowy Land around Lake Guru Dong Maar

- Copy of the letter issued by SDM Chungthang stating the Land in subject not under govt records.

Therefore Sir, You are kindly requested to elaborate if the land at the shore of the Lake Guru Dongmar in north Sikkim is a forest land? We need proper information and confirmation from your office as only your office in India maps the forests. Your kind reply is awaited at the earliest.

Thanks and regards.
